TABLE OF CONTENTS

1 PREFACE 4

2 MANAGEMENT SUMMARY 5

3 THE EVOLUTION OF THE MHEALTH MARKET 7

3.1 THE PROMISED BENEFITS OF MHEALTH APPLICATIONS 8
3.1.1 The promise of improved patient outcomes 8
3.1.2 The promise of reduced health care costs 9
3.2 WHAT INITIATED THE MHEALTH APPLICATION MARKET 12
3.3 THE THREE PHASES OF MHEALTH MARKET DEVELOPMENT 14
3.3.1 The trial phase 15
3.3.2 Commercialization phase 17
3.3.3 Integration phase 19

4 THE SMARTPHONE APPLICATION MARKET PHENOMENA 24

4.1 THE INCREASING NUMBER OF APPLICATIONS AND APP STORES 24
4.2 THE GROWTH OF SMARTPHONE SHIPMENTS AND MOBILE PLATFORMS 28
4.3 THE DECLINE IN APPLICATION PRICES ON MOBILE PLATFORMS AND APP STORES 30
4.4 MARKET SHARES AND GROWTH OF APPLICATION MARKET REVENUE 31

5 STATUS OF THE MOBILE HEALTH APPLICATION MARKET. THE INITIAL YEARS 2010-2012 34

5.1 MHEALTH FACTS AND FIGURES 2010-2012 35
5.1.1 Growth of mHealth application numbers and proliferation into today's app stores 35
5.1.2 mHealth business model changes and price decline 2010-2012 39
5.2 DOWNLOADS FOR TOP 10 MHEALTH APPLICATIONS PUBLISHERS (USA, UK, JAPAN, BRAZIL, GERMANY) 43
5.2.1 Top 10 mHealth app download number on the Apple App Store 43
5.2.2 Top 10 mHealth app download number on the Google Play Store (Android) 45
5.3 MHEALTH APPLICATION PUBLISHER STRATEGIES 2010-2012 46
5.3.1 Business potential 47
5.3.2 Main Target Groups and distribution channels 51

6 THE MHEALTH APPLICATION CATEGORIES 57

6.1 GENERAL HEALTHCARE AND FITNESS 61
6.1.1 Fitness & nutrition 61
6.1.2 Health tracking tools 64
6.1.3 Managing medical conditions 65
6.1.4 Medical compliance 67
6.1.5 Wellness (traditional and corporate) 69
6.2 MEDICAL INFORMATION 72
6.2.1 Reference 72
6.2.2 Diagnostic Tools 74
6.2.3 Continuing Medical Education (CME) 76
6.2.4 Alerts and Awareness 78
6.3 REMOTE MONITORING, COLLABORATION, AND CONSULTATION 79
6.3.1 Remote monitoring (safety) 79
6.3.2 Remote Consultation 81
6.3.3 Remote Collaboration 82
6.4 HEALTHCARE MANAGEMENT 83
6.4.1 Logistical & payment support 84

6.4.2 Patient health records 85

7 TRENDS THAT WILL SHAPE THE COMMERCIALIZATION PHASE OF MHEALTH APPLICATIONS 87

7.1 SMARTPHONE USER PENETRATION WILL BE THE MAIN DRIVER FOR THE MHEALTH UPTAKE 88
7.2 MHEALTH APPLICATIONS WILL BE TAILORED SPECIFICALLY FOR SMARTPHONES OR TABLETS 89
7.3 MHEALTH APPLICATIONS WILL BE NATIVE RATHER THAN WEB-BASED APPLICATIONS 90
7.4 MHEALTH NICHE STORES WILL BECOME THE HOME OF THE 2ND GENERATION OF MHEALTH APPS 92
7.5 MISSING REGULATIONS ARE THE MAIN MARKET BARRIER DURING THE COMMERCIALIZATION PHASE 94
7.6 BUYERS WILL CONTINUE TO DRIVE THE MARKET 96
7.7 APPLICATIONS WILL ENTER TRADITIONAL HEALTH DISTRIBUTION CHANNELS 97
7.8 MHEALTH MARKET WILL GROW MAINLY IN COUNTRIES WITH HIGH SMARTPHONE PENETRATION AND HEALTH EXPENDITURE 98
7.9 2ND GENERATION MHEALTH APPLICATIONS WILL FOCUS ON CHRONIC DISEASES 99
7.10 MHEALTH BUSINESS MODELS WILL BROADEN 100

8 THE SIZE OF THE MHEALTH MARKET 2010-2017 102

9 APPENDIX 109

9.1 MHEALTH COMPANIES THAT HAVE SHARED THEIR VIEW ON THE MHEALTH MARKET DURING THE INITIAL YEARS 109
9.2 LIST OF FIGURES 112
9.3 LIST OF TABLES 114
9.4 ABOUT RESEARCH2GUIDANCE 115

LIST OF FIGURES

Figure 1: Healthcare expenditure as a percentage of GDP (1980-2009) 10
Figure 2: iPhone shipments before and after the App Store launch (in millions) 14
Figure 3: mHealth market phases 15

Table 4: Characteristics of the integration phase 20

Table 5: Potential use cases of smartphone features in mHealth 21

Table 6: mHealth applications categories 57

Table 7: Specifications for quick reference of mHealth application categories (Legend) 61

Table 8: European examples of traditional mHealth business models 100

2 MANAGEMENT SUMMARY

The market for mHealth applications is developing along three different phases. Currently mHealth players have managed to get exit the initial trial phase and have entered the commercialization phase of the market. This phase can be characterized by a massive increase of offered solutions, the creation of new business models and the concentration on private, health-interested people, patients and corporations as major target groups.

Missing regulations is seen as one of the major barriers for the mHealth market to enter the next market phase: the integrated phase. In this phase, mHealth applications will become an integrated part of doctors' treatment plans. In this phase health insurers will become the main payer, especially for the more advanced mHealth solutions (2nd generation mHealth applications).

Currently more than 97.000 mHealth applications are listed on 62 full catalogue app stores. The majority of these applications are general health and fitness apps that both facilitate the tracking of health parameters by private users, and provide users with basic health and fitness related information as well as guidance.

The general sophistication of today's mHealth applications is low to medium, and many of the mHealth categorized applications provide a limited benefit for patients, doctors and health interested smartphone users. Nevertheless, advanced solutions do exist. Twenty such solutions are described and examined later in the report.

Top 10 mHealth applications generate up to 4 million free and 300.000 paid downloads per day. There are significant differences in download numbers between countries (US, UK, Germany, Japan and Brazil are analyzed in the report), platforms (Android and Apple) and devices (smartphones and tablets).

The mHealth market will develop in line with the smartphone application market, but there are 10 specific market drivers that will shape the market during the commercialization phase.

Five years from now, the mHealth market will be a mass market with a reach of more than 3,4 billion smartphone and tablet with access to mobile applications. By that time, 50% of these users will have downloaded mHealth applications.

By the end of 2017, the total mHealth market revenue will have grown by 61% (CAGR) to reach US$26 billion. The main sources of revenue will not come from application download revenue itself, but from mHealth services and hardware sales. Applications serve as platforms to sell other health services and hardware.

This growth projection is based on the assumption that private buyers will continue to be the primary spenders in the next five years, but that the integration of mHealth applications into traditional health care systems will become more and more common (integrated phase) during that time.

This report is the 3rd edition published annually since 2010. Besides the detailed description of facts and figures of the market's early years (2010-2012), market trends, application categories, and market forecasts, the report also provides a comparison of how mHealth application publishers have changed their views and strategies over the course of the last three years (2010-2012).

9 APPENDIX

9.1 MHEALTH COMPANIES THAT HAVE SHARED THEIR VIEW ON THE MHEALTH MARKET DURING THE INITIAL YEARS

Over the course of the years 2010, 2011 and 2012 more than 1.000 companies have shared their views on how the mHealth market will develop. The following tables list the companies which gave permission to publish their company names.

mHealth survey's participants 2010				
3C Strategy Limited	CONSORTIUM SANTE FRANCE	icom group	National Institutes of Health	Shivya Cosmoplast
Able Eye Device Co., Ltd	CSC	IKERLAN	National Lab for Drug Control	Sicap AG
Abt Associates	Darwin HC	iLabs Medical	NGN	Siemens AG
Active Medicine	DD Studio	IMS Health	NHS	Silverlink Communications
ACUMED	Deepak Foundation	Independent Management Consultant	Nokia	SingTel
AEON Connected Health	Federal Department of Health (Australia)	Infisys Inc.	Novo Nordisk	SM2 Surveillance Médicale
Allina	Derdack	INFORSON	NowPos M Solutions	SMi Group
Altys Technology	Desert Oasis HealthCare	Innovacom	Nurture Connect, Inc	SML Associates Ltd
Anexim Sales Consulting Pvt. Ltd.	Detecon	Instera	Omnicom	Sofomo Embedded Solutions Pvt Ltd

9.4 ABOUT RESEARCH2GUIDANCE

research2guidance is a market intelligence and consultancy company specializing in the mobile apps market.

Our service offerings

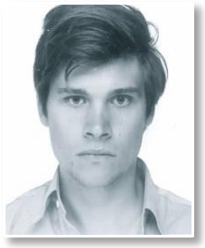

- **Reports and PowerPoint slide-sets:** market insights on selected topics.
- **Bespoke research:** custom-made research for your individual needs.
- **Knowledge center:** a subscription to a wealth of data, analysis, profiles, and daily news and opinion.
- **Consulting services:** projects tailored to assist you in developing your mobile strategy.

Our analyst team

Ralf-Gordon Jahns

Ralf is the research director of research2guidance. He has worked for more than 19 years in the telecom and media industry. Prior to research2guidance he worked as a partner for Capgemini Telecom Media & Networks. Ralf is a frequent keynote speaker on mobile industry events, publisher of a multitude of mobile market reports and executive consultant of more than 30 clients in the telecom and media industry.

Patrick Houck

Patrick is a research analyst at research2guidance with a focus on health IT technologies. During the last two years he has evaluated a number of mobile health and "eHealth" technologies. Previously he worked for Health 2.0 LLC. Patrick holds a degree in Public Health at Tulane University.
